

MDrones

The MDrones plugin provides full integration of the UAV Commander software with the Genetec Security Center platform. This integration enables the execution of automatic and semi-automatic drone missions, as well as real-time drone monitoring directly in Genetec.

FEAUTES

- **Direct integration** with Genetec Security Center.
- **Real-time drone data visualization** through RTSP video streams.
- **Execution of automatic missions** triggered by alarms.
- **Full drone control**, including pause and return-to-base commands.

PART NUMBER Y CONEXIONES SDK

- Requires two SDK connections with part number GSC-1SDK-SAN2-MDRONES, plus one additional connection for each extra operator workstation.

REQUERIMIENTOS EXTERNOS

- Drones compatible with MDrones UAV Commander, supporting telemetry data and RTSP video streams.
