

SCATI INTEGRATION IN GENETEC

The San2.Scati plugin is an extension for Genetec Security Center that enables the integration of Scati recorders. It facilitates video unit management in Genetec, allowing live and recorded video viewing, as well as receiving alarms from Scati recorders.

FEATURES

- **Integration of Scati recorders** into Genetec Security Center.
- **Live and recorded** video viewing.
- **Reception of alarms** from Scati recorders.
- Configuration of recorders and video units from **Genetec Config Tool**.
- **Real-time** alarm monitoring.

PART NUMBER AND SDK CONNECTIONS

- Each concurrent user who wishes to operate with the plugin requires an SDK connection with the part number "GSC-1SDK-SAN2-SCATI."

REQUERIMIENTOS EXTERNOS

- Genetec Security Center 5.9 or higher.
- License for the Scati SDK to communicate with the recorders.
- Server with the San2.Scati service installed and configured.
